Anna, Nancy, Chad, Richard:

Sorry for the delayed response. I wasn't seeing emails on my iPhone. They all just downloaded.

I greatly appreciate all of you taking the time to meet with us. It was hugely helpful. And thank you for providing these documents and the names of some experts. This is extremely useful.

I am sorry you are furloughed. We in INL have a few weeks of funding to keep us going, so I am available if you need to reach me.

I will pass all the info you have given me to our team in Bogota. I'm sure it will help the Colombian government make their case.

Best wishes for a fun and safe holiday season (given the circumstances). Happy New Years.

Chris

Subject: EPA's glyphosate docs

Hi Chris

Per your request, here is the key pages from our assessments that are likely of interest for the Colombian efforts to restart the aerial program & for using glyphosate as the herbicide.

1. The list of all our glyphosate evaluations can be found here:  
<https://www.epa.gov/ingredients-used-pesticide-products/draft-human-health-and-ecological-risk-assessments-glyphosate>

The human health assessment can be found at <https://www.regulations.gov/document?D=EPA-HQ-OPP-2009-0361-0068>

We suggest you have the Executive Summary translated to Spanish. It can be found on pp. 3-5

Our cancer evaluation that includes edits from the FIFRA SAP can be found at <https://www.regulations.gov/document?D=EPA-HQ-OPP-2009-0361-0073>

Our ecological assessment can be found at <https://www.regulations.gov/document?D=EPA-HQ-OPP-2009-0361-0077>

This file provides detailed calculations of various use rates & application frequencies and their associated risks to the environment. I think it's probably the information in Tables 47 & 48 that are of most interest to you.

1. I've attached the Canadian decision document for your convenience. They have a simple one page executive summary that could be translated to Spanish.

Happy New Year,  
Anna
